

PRIDAR Chatbot

User Manual

This user manual will take you through the basics of the PRIDAR chatbot. If you interact correctly with it, the bot will gladly guide you through it's functionality!

Before We Begin

The PRIDAR Chatbot is entirely hosted on our end, so you don't have to worry about installing anything!

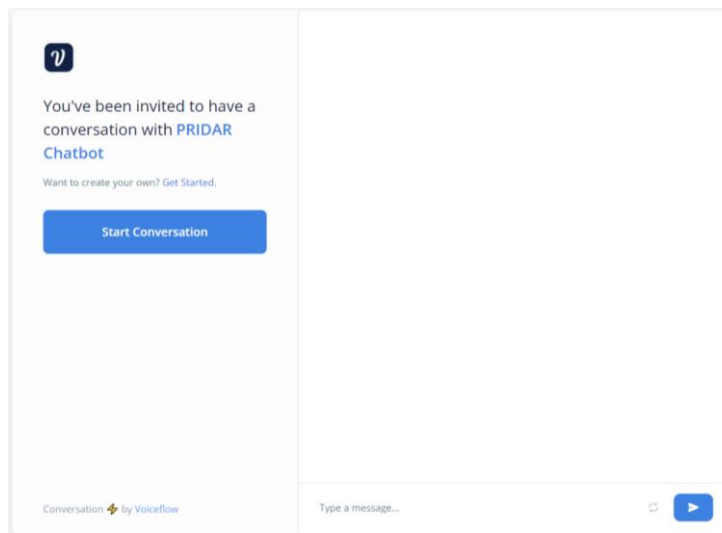

You can choose to interact with the bot either through Voiceflow's front end web app, or Telegram.

Voiceflow Web-App

To get started in the web app version, open the Voiceflow url to the project:

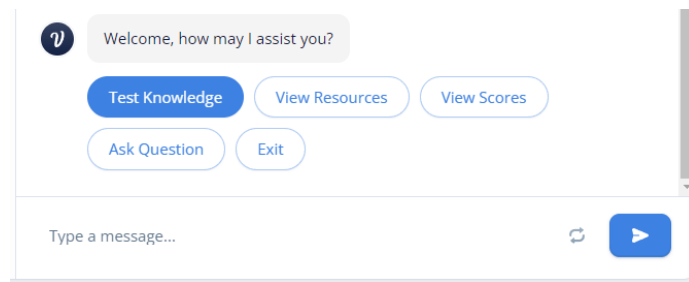

<https://creator.voiceflow.com/prototype/62267ce4f5b2aa001c715506>

You should be greeted with the following screen:

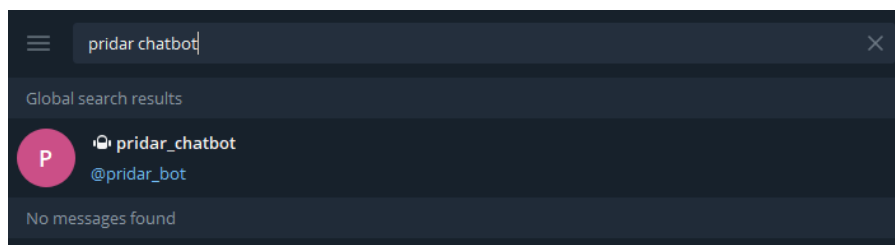

If not, try creating an account, logging in, and then retrying the link.

Inside of the web app version, you will sometimes be given buttons, please click them instead of typing!

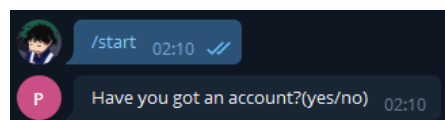

Telegram

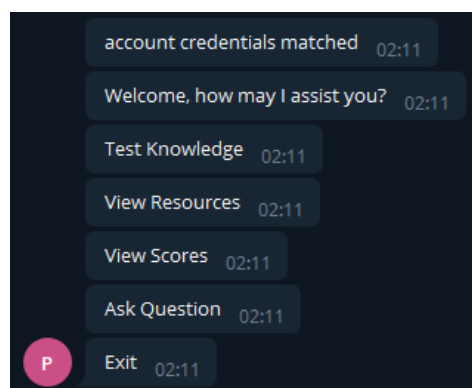

To get started in Telegram, first search for “pridar chatbot”:

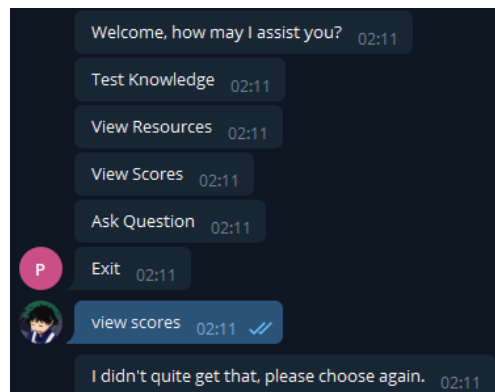

A start button should appear once you click on the bot, but if not, simply message it the command “/start” to get it going.

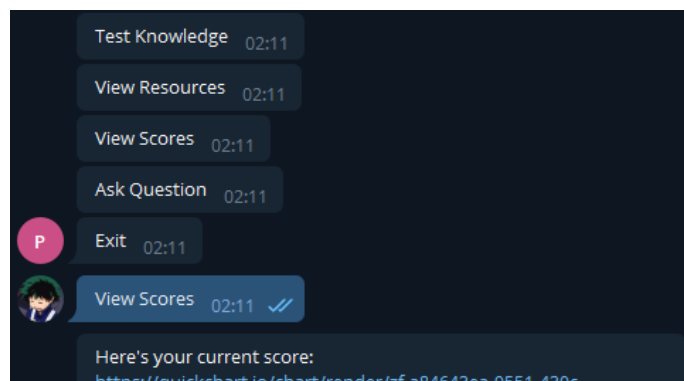

This version of the bot doesn't give you any nice buttons to click on, instead displaying them as messages:

Please note that for the moment, the bot expects a case sensitive response, exactly matching the text for each of the buttons.

Incorrect response:

Correct response:

Email

Remember to keep an eye out in the inbox of your account's email for the following:

- Verification code upon signup
- Password reminder upon request
- Answer to questions you have asked through the bot

Further Questions

If you have any further queries, or would like access to your data for viewing, updating, or deletion, please don't hesitate to get in touch with us!

Adel Mouffok - adel.mouffok.20@ucl.ac.uk

Fraser Thomson - fraser.thomson.20@ucl.ac.uk

Linta Rahman - linta.rahman.20@ucl.ac.uk

We hope you have a fun and educational experience with our bot!

Feedback is also much appreciated 😊
