Assessment template

Each student will be given a score of 0 to 5 for each task

0 - the student did not attempt to complete the task

1 - the student may have attempted the task, however with insufficient effort (no functional code is written); the program is not functional

2 - the student has made an honest attempt in writing a program; some logic of the code can be followed

3 - the program is partially functional; at least half of the code can be run independently of other parts

4 - the program is mostly functional, **runs** and produces some output, though not necessarily correct

5 - the program is fully functional and produces correct output
