

Since our WhatsApp Connector has been deployed, there is a slight variation for using our WhatsApp connector. There is no need to clone it, simply follow these steps to create a new connection.

As for the Webex connection, please follow the rest of the steps in the video to clone it.

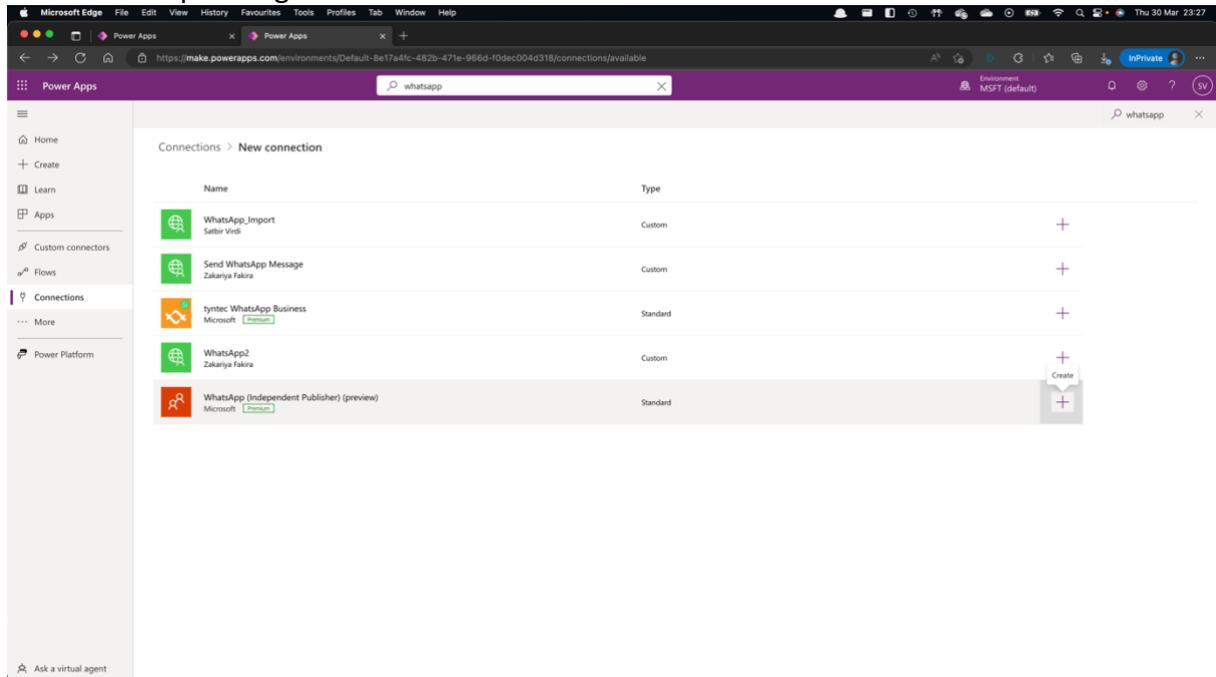

Click on “Select during import” next to the Deployed\_Connection row and click on create new from the side pane menu.

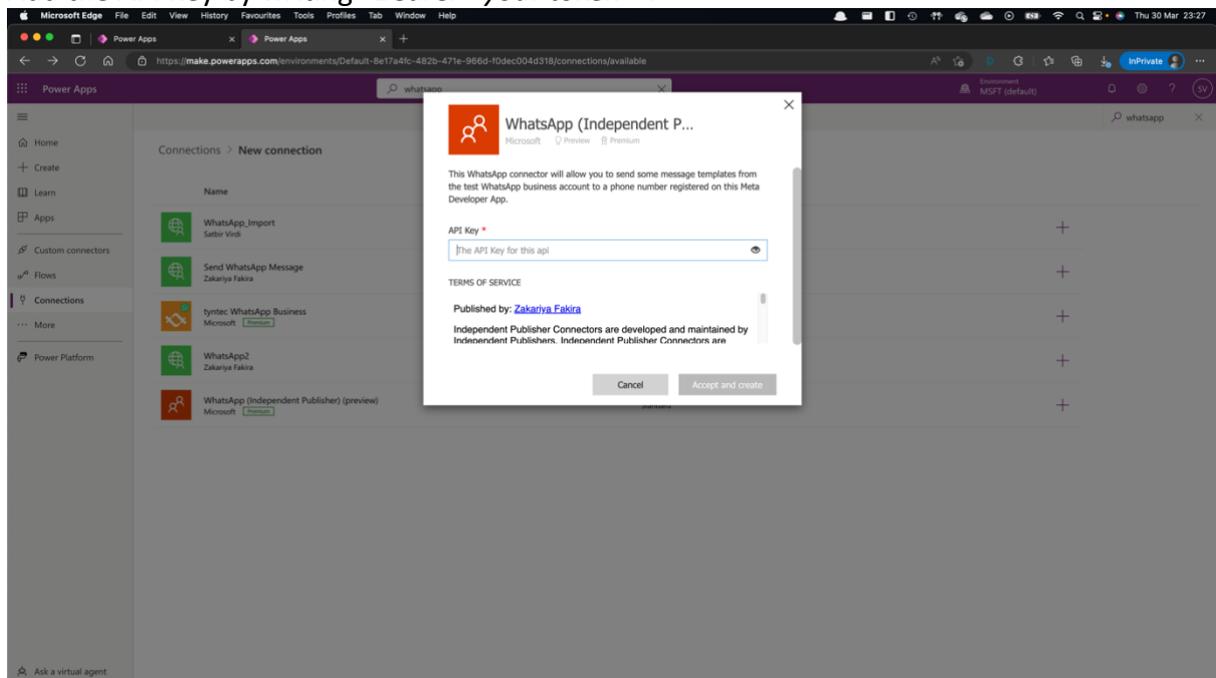

## Search for WhatsApp

Click on the “plus” sign to create a connection.

Add the API Key by writing “Bearer <your token>”.

# Your connection is created!

The top screenshot shows the 'Import package' screen in the Power Apps environment. It displays package details for 'Team18\_Canvas\_App' and a table for 'Review Package Content' and 'Related resources'.

NAME	RESOURCE TYPE	IMPORT SETUP	ACTION
Online Consultation	App	Create as new Online Consultation 2	

NAME	RESOURCE TYPE	IMPORT SETUP	ACTION
WebEx - 1	Connector	Select during import Webex_Import	
Webex_WhatsApp_V3	Flow	Create as new	
sendReminder	Flow	Create as new	
WebEx - 1	WebEx - 1 Connection	Select during import Webex_Import	

The bottom screenshot shows the 'Connections in MSFT (default)' screen. It displays a table of connections:
